

ABOUT ME

I am a versatile web developer that always want to learn new technologies. I am able to create a web application from end to end using and agile development and modern work strategy. I am currently building a operational real-time dashboard as part of my work-study program for a industrial company (Wilo, Laval).

I also have a background in design and marketing from my MMI degree, giving me extra skills in graphic design, video editing, and digital strategy.

SKILLS

- Experienced in modern frameworks like React, Symfony or Node.
- Skilled in Full-Stack development, from agile methodologies to UAT and SEO.
- Track record in delivering operational tools, in my studies, as well as my work-study program.
- B2 English with conversational and professional communication skills, as proven in my work-study program.

WORK EXPERIENCE

MES Developer – Wilo (Laval)

September 2026 – september 2026 (one-year work-study program)

- Developed a real-time dashboard that improved production monitoring and operational efficiency.
- Collaborated with an international team, composed with french, and german developers.
- Organized meetings with the dev team to present the current build of the project.
- Followed agile methods through dev sprint.

Web Integrator – Desk53 (Laval)

February 2025 – April 2025 (10 week internship)

- Developed a web application featuring AI audio and text synchronization.
- Developed interactive educational games, including word searches and sudoku grids.
